

Press Release

All new P75 mk3

We are pleased to announce an all new P75 mk3.

This is the P75's first major design update and we have invested significantly to improve its appearance, performance, packaging and added new features.

Improvements include:

- Upgrade in quality, new paint finish to match new amplifier range
- New **glass front panel**, innovative process, tough, scratch resistant
- Custom made black stainless fasteners and new earth terminal
- New **multi-layer printed circuit board** for even lower noise
- New output amplifier for **lower noise** and **more drive current**
- More **loading** adjustments, incl user fitted resistor/capacitor
- More **headroom** from internal power supply
- More **gain** adjustments
- **MM gain** can now be adjusted
- Support for **1mV** MM/MC output cartridges
- Power supply polarity changed to **centre positive**
- New packaging
- Improved format owner's manual, even easier to use
